

Solenoid Driver

KFD2-SLD-Ex2.1545

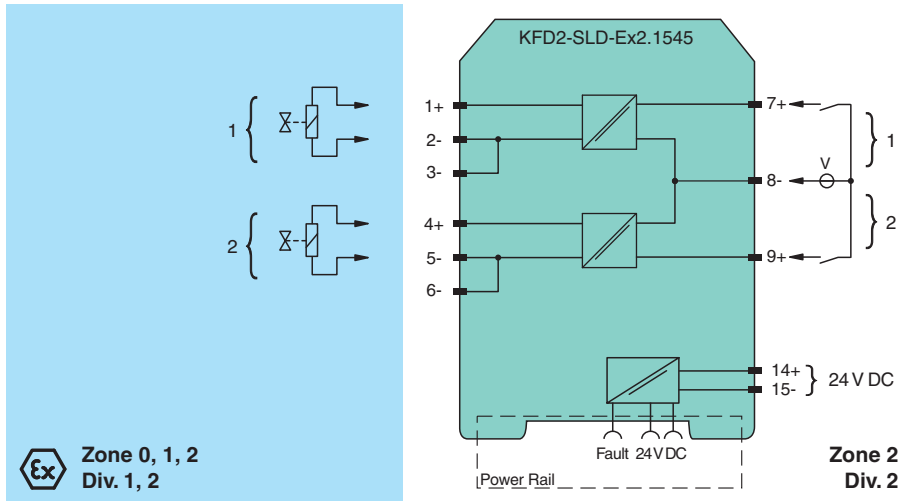

- 2-channel isolated barrier
- 24 V DC supply (bus or loop powered)
- Output 45 mA at 15 V DC
- Line fault transparency (LFT)
- Test pulse immunity
- Up to SIL 3 acc. to IEC/EN 61508

Function

This isolated barrier is used for intrinsic safety applications. The device supplies power to solenoids, LEDs and audible alarms located in the explosion-hazardous area. The device is controlled with a loop powered signal or a bus powered logic signal. The device is immune to the test pulses of various control systems. The device simulates a minimum load at the input. The minimum load is set via the mode of operation. In the loop-powered mode of operation, a minimum load of 35 mA is simulated. In the bus-powered mode of operation, a minimum load of 5 mA is simulated. The line fault transparency function can display a line fault in the field by a change in impedance at the switching input of the solenoid driver. A fault is indicated by LEDs and output via a fault indication output.
