

- 1-channel
- Output EEx ia IIC
- 24 V DC nominal supply voltage
- Logic input for connection and disconnection
- Up to SIL3 acc. to IEC 61508

Current limit 35 mA
KFD2-SL-Ex1.48

Application

- Control/supply of intrinsically safe valves, audible alarms, indicators etc.
- Control/supply of semiconductors (e. g. LED or LCD units)
In case of controlling semiconductors, a parallel resistor of approx. 10 kΩ, directly connected at the load, may be necessary, if the lead breakage monitoring is activated.

Function

The KFD2-SL-Ex1.48 and KFD2-SL-Ex1.48.90A each have a logic input which is isolated from the power supply. The field device is controlled across the logic input.

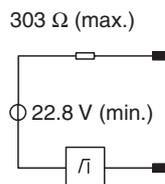

Voltage signals in a range of 5 V DC ... 35 V DC are accepted as Logic-1. Logic-0 must lie in the range of 0 V DC ... 2.2 V DC. The open circuit voltage at the output is dependent on the supply voltage. The relationship is as follows: (supply voltage - 1 V) x 1.3.

The voltage limit at the output is set by a supply voltage of 20 V DC. Therefore, the maximum open circuit voltage at the output is 26 V DC. The output current is limited to 35.3 mA (KFD2-SL-Ex1.48) or 45.3 mA (KFD2-SL-Ex1.48.90A) depending on the model.

The output, logic input and power supply are galvanically isolated from each other.

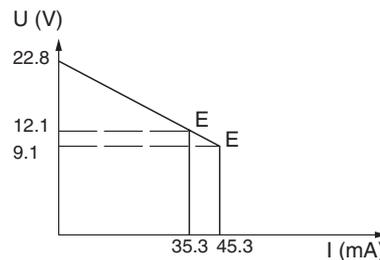

Notes

Output circuit diagramm

Output characteristic for input voltage 20 V ... 35 V

E: Curve angle point (U_E, I_E)

Supplementary information

EC-Type Examination Certificate, Statement of Conformity, Declaration of Conformity and instructions have to be observed. For information see www.pepperl-fuchs.com.
